The TI033 programmable wall switch has been designed to control lightings and motors:

### Applications

The TI033 programmable wall switch has been designed to control lightings and motors.

<table>
<thead>
<tr>
<th>Load type</th>
<th>Maximum load</th>

</table>
| Resistive load | 2400 W       | • incandescent lights  
|                | (20 A @ 120 V)| • halogen lights   |
|                |              | • block heater    |
| Inductive load | 2400 W       | • fluorescent lights  
|                | (20 A @ 120 V)| • compact fluorescent lights (CFL)  
|                |              | • sodium lamps      |
| Motor          | 1 hp         | • pool filter pumps  
|                |              | • fans              |

### Installation

**NOTE:** This switch cannot be used if there are not at least 2 white wires joined by a connector inside the electrical box.

1. Cut power at the circuit breaker to avoid electric shock.
2. Remove the existing switch.
3. Install the new switch as shown in the diagram below.
4. Apply power at the circuit breaker.

### Setting the Clock

**NOTE:** The switch displays the time in 24-hour format by default or following a reset.

1. To change to 12-hour format (or vice versa), proceed as follows:
   a) Press one of the control buttons to ensure the **MAN** or **AUTO** indicator is displayed.
   b) Press the **MIN** and **HOUR** buttons simultaneously and briefly (0:00 display = 24-hour, 12:00 display = 12-hour).
2. Set the time using the **HOUR** and **MIN** buttons. If you have selected the 12-hour format, ensure that **PM** appears on the screen when an afternoon time is displayed.
3. Set the day by using the **DAY** button.
4. Press one of the control buttons or close the switch door to return to normal operation.

### Selecting the Operating Mode

The programmable switch has 2 operating modes: manual (**MAN**) and automatic (**AUTO**). To switch mode, press the switch door for 3 seconds.

**Manual Mode**
The programmable switch operates as a regular switch. Briefly press the switch door to turn the lights On or Off. The mode (**MAN**) and state (**ON** or **OFF**) are displayed.

**Automatic Mode**
The programmable switch follows the programmed schedule. The mode (**AUTO**), state (**ON** or **OFF**) and current program number are displayed.

To temporarily override the programmed schedule, briefly press the switch door. The new state (**ON** or **OFF**) will flash to show that this state is temporary. The override remains in effect until you press the switch door again or until the beginning of the next program.

### Programming

You can set up to 7 programs. To set a program, you need to enter its start time (**ON**) and its end time (**OFF**).

1. Pry the switch door open using a small screwdriver.
2. Ensure the **ON/OFF** selector is set to **ON**.
3. Reset the switch using a paper clip. 0:00 and **MO** will flash.
4. If the display is blank:
   a) Ensure the **ON/OFF** selector is properly engaged in the **ON** position. Push it to the right using a small screwdriver.
   b) To change to 12-hour format (or vice versa), proceed as follows:
      a) Press one of the control buttons to ensure the **MAN** or **AUTO** indicator is displayed.
      b) Press the **MIN** and **HOUR** buttons simultaneously and briefly (0:00 display = 24-hour, 12:00 display = 12-hour).
   c) Set the time using the **HOUR** and **MIN** buttons. If you have selected the 12-hour format, ensure that **PM** appears on the screen when an afternoon time is displayed.
   d) Set the day by using the **DAY** button.
   e) Press one of the control buttons or close the switch door to return to normal operation.

**NOTE:** The switch displays the time in 24-hour format by default or following a reset.

1. To change to 12-hour format (or vice versa), proceed as follows:
   a) Press one of the control buttons to ensure the **MAN** or **AUTO** indicator is displayed.
   b) Press the **MIN** and **HOUR** buttons simultaneously and briefly (0:00 display = 24-hour, 12:00 display = 12-hour).
2. Set the time using the **HOUR** and **MIN** buttons. If you have selected the 12-hour format, ensure that **PM** appears on the screen when an afternoon time is displayed.
3. Set the day by using the **DAY** button.
4. Press one of the control buttons or close the switch door to return to normal operation.

### Power-On

1. Pry the switch door open from the bottom using a small screwdriver.
2. Ensure the **ON/OFF** selector is set to **ON**.
3. Reset the switch using a paper clip. 0:00 and **MO** will flash.
4. If the display is blank:
   a) Ensure the **ON/OFF** selector is properly engaged in the **ON** position. Push it to the right using a small screwdriver.

**Applications**

1. *Load type* Maximum load Examples
2. *Resistive load* 2400 W (20 A @ 120 V) • incandescent lights  
   • halogen lights  
   • block heater
3. *Inductive load* 2400 W (20 A @ 120 V) • fluorescent lights  
   • compact fluorescent lights (CFL)  
   • sodium lamps  
   • electronic ballasts
4. *Motor* 1 hp • pool filter pumps  
   • fans

**Installation**

**NOTE:** This switch cannot be used if there are not at least 2 white wires joined by a connector inside the electrical box.

1. Cut power at the circuit breaker to avoid electric shock.
2. Remove the existing switch.
3. Install the new switch as shown in the diagram below.
4. Apply power at the circuit breaker.

1. *Load type* Maximum load Examples
2. *Resistive load* 2400 W (20 A @ 120 V) • incandescent lights  
   • halogen lights  
   • block heater
3. *Inductive load* 2400 W (20 A @ 120 V) • fluorescent lights  
   • compact fluorescent lights (CFL)  
   • sodium lamps  
   • electronic ballasts
4. *Motor* 1 hp • pool filter pumps  
   • fans
Press the HOUR and MIN buttons to set the ON time (time when you want the lights to turn on). If you have selected the 12-hour format, ensure that PM appears on the screen when an
afternoon time is displayed.

After you have programmed the ON time, press the PGM button to display the OFF time (time when you want the lights to turn off).

Repeat steps 3 through 5 to program the OFF time. If the program ON time is set for every day of the week, the program OFF time will automatically be set for every day.

To set another program, repeat steps 2 through 6. Programs that are not set will remain inactive.

Press one of the control buttons or close the switch door to return to normal operation.

Clearing a Program
Press the PGM button until the desired program is selected. Hold the PGM button for 3 seconds. -:--:-- appears when the program is erased.

Troubleshooting

Blank display
• Verify circuit breaker at main panel.
• Ensure the ON/OFF selector is at ON.
• Reset the switch using a paper clip.

Faded or irregular display
Ambient temperature below freezing point

Cannot switch between 24-hour format and 12-hour format
First, press one of the control buttons so that MAN or AUTO appears on display.

Programs do not run as expected
• Make sure the switch is properly programmed.
• Note that -:--:-- indicates an inactive program, 00:00 indicates midnight.
• If the switch has been configured for 12-hour format, check that PM appears on the left side of the screen when an afternoon time is displayed.

The switch resets itself without apparent reason when used to control an inductive load such as a relay or a contactor.

The reset is caused by the load. Install a snubber (AC130-03) at each relay/contactor.

Technical Specifications
Supply: 120 VAC, 50 / 60 Hz
Maximum load: 2400 watts resistive or inductive, 1 HP motor
Operating temperature range: 5°F to 122°F (-15°C to 50°C)
Storage temperature range: -4°F to 122°F (-20°C to 50°C)
Power outage: The programs are protected by a rechargeable battery. The screen is blank during the power outage.

Certifications: CSA & UL

Warranty
AUBE warrants this product, excluding battery, to be free from defects in the workmanship or materials, under normal use and service, for a period of three (3) years from the date of purchase by the consumer. If at any time during the warranty period the product determined to be defective or malfunctions, AUBE shall repair or replace it (at AUBE’s option).

If the product is defective, (i) return it, with a bill of sale or other dated proof of purchase, to the place from which you purchased it, or
(ii) contact AUBE. AUBE will make the determination whether the product should be returned, or whether a replacement product can be sent to you.

This warranty does not cover removal or reinstallation costs. This warranty shall not apply if it is shown by AUBE that the defect or malfunction was caused by damage which occurred while the product was in the possession of a consumer.

AUBE’s sole responsibility shall be to repair or replace the product within the terms stated above. AUBE SHALL NOT BE LIABLE FOR ANY LOSS OR DAMAGE OF ANY KIND, INCLUDING ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING, DIRECTLY OR INDIRECTLY, FROM ANY BREACH OF ANY WARRANTY, EXPRESS OR IMPLIED, OR ANY OTHER FAILURE OF THIS PRODUCT. Some provinces, states or regions do not allow the exclusion or limitation of incidental or consequential damages, so this limitation may not apply to you.

THIS WARRANTY IS THE ONLY EXPRESS WARRANTY AUBE MAKES ON THIS PRODUCT. THE DURATION OF ANY IMPLIED WARRANTIES, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IS HEREBY LIMITED TO THE THREE-YEAR DURATION OF THIS WARRANTY. Some provinces, states or regions do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.
